

Amendments to the Claims:

Deleted text is shown in strikethrough format and added text is underlined.

This listing of claims will replace all prior versions, and listings, of claims in the application.

Listing of Claims:

- B10
1. (Original) An isolated antibody comprising an Fc region and three or more antigen binding sites amino-terminal to the Fc region.
 2. (Original) The antibody of claim 1 comprising four antigen binding sites.
- Please cancel claim 3 without prejudice to later prosecution.
4. (Original) The antibody of claim 1 comprising a polypeptide chain, wherein the polypeptide chain comprises two or more variable domains.
 5. (Original) The antibody of claim 4 wherein the polypeptide chain comprises VD1-(X1)_n-VD2-(X2)_n-Fc, wherein VD1 is a first variable domain, VD2 is a second variable domain, Fc is one polypeptide chain of an Fc region, X1 and X2 represent an amino acid or polypeptide, and n is 0 or 1.
 6. (Original) The antibody of claim 5 comprising two or more polypeptide chains, each comprising VD1-(X1)_n-VD2-(X2)_n-Fc.
 7. (Original) The antibody of claim 1 comprising at least one polypeptide chain with the formula:
 - (a) VH-CH1-flexible linker-VH-CH1-Fc region chain; or
 - (b) VH-CH1-VH-CH1-Fc region chain.
 8. (Original) The antibody of claim 1 comprising at least two light chain variable domain polypeptides.
 9. (Original) The antibody of claim 8 wherein the light chain variable domain polypeptides further comprise a CL domain.

Please cancel claim 10 without prejudice to later prosecution.

Response to Office Action mailed on March 27, 2003

11. (Once Amended) The antibody of claim ~~10~~ 7 wherein the flexible linker comprises a the peptide ~~selected from the group consisting of gly-ser, gly-ser-gly-ser (SEQ ID NO:10), ala-ser, and gly-gly-gly-ser (SEQ ID NO:11).~~

12. (Original) The antibody of claim 1 which is internalized faster than a bivalent antibody by a cell expressing an antigen to which the antibodies bind.

13. (Original) The antibody of claim 1 which is an agonist antibody.

14. (Original) The antibody of claim 1 which induces apoptosis.

15. (Original) The antibody of claim 1 wherein the three or more antigen binding sites all bind the same antigen.

16. (Original) The antibody of claim 1 wherein the three or more antigen binding sites bind two or more different antigens.

*BIO
under 20x
cancelled*
Please cancel claims 17-20 without prejudice to later prosecution.

21. (Once Amended) The antibody of claim 1 which binds a DR5 receptor ~~in the Tumor Necrosis Factor (TNF) receptor superfamily.~~

Please cancel claims 22 - 24 without prejudice to later prosecution.

25. (Original) The antibody of claim 21 which is an agonist antibody.

26. (Original) The antibody of claim 21 which induces apoptosis.

Please cancel claims 27-32 without prejudice to later prosecution.

33. (Original) An isolated antibody comprising three or more antigen binding sites, wherein the antibody is capable of binding a receptor in the Tumor Necrosis Factor (TNF) receptor superfamily.

34. (Original) The antibody of claim 33 which is not a native sequence IgM or IgA antibody.

35. (Original) The antibody of claim 33 which has only one Fc region or lacks an Fc region.

Response to Office Action mailed on March 27, 2003

36. (Original) The antibody of claim 33 which comprises a polypeptide chain, wherein the polypeptide chain comprises two or more variable domains.
37. (Original) The antibody of claim 33 which comprises four antigen binding sites each capable of binding the TNFR5 receptor.

Please cancel claims 38-40 without prejudice to later prosecution.

41. (Original) The antibody of claim 33 which is an agonist antibody.
42. (Original) The antibody of claim 33 which induces apoptosis.

Please cancel claims 43-56 without prejudice to later prosecution.

57. (Once Amended) A polypeptide chain comprising:
- (a) VH-CH1-flexible linker-VH-CH1-dimerization domain; or
VH-CH1-VH-CH1-dimerization domain; and
wherein the dimerization domain comprises an Fc region.
58. (Original) An isolated antibody comprising the polypeptide chain of claim 57.
59. (Original) The antibody of claim 58 further comprising two or more light chain variable domain polypeptides.
60. (Original) The antibody of claim 59 wherein the light chain variable domain polypeptides comprise VL-CL.
61. (Once Amended) An isolated antibody comprising a dimerization domain and three or more antigen binding sites amino-terminal thereto.
62. (Original) The antibody of claim 61 wherein the dimerization domain is selected from the group consisting of a hinge region, an Fc region, a CH3 domain, and a CH4 domain.
63. (Original) The antibody of claim 62 wherein the dimerization domain is a hinge region.
64. (Original) The antibody of claim 63 wherein the dimerization domain further comprises a leucine zipper.

Amdt. dated September 26, 2003

Response to Office Action mailed on March 27, 2003

65. (Original) The antibody of claim 63 comprising a polypeptide chain comprising the formula:

(a) VH-CH1-flexible linker-VH-CH1-hinge region; or

(b) VH-CH1-VH-CH1-hinge region.

66. (Original) A polypeptide chain comprising three or more heavy chain or light chain variable domains, wherein each of the variable domains is able to combine with three or more light chain or heavy chain variable domain polypeptides to form three or more antigen binding sites, each directed against the same antigen.

Please cancel claim 67 without prejudice to later prosecution.

68. (Original) The polypeptide chain of claim 66 which comprises four heavy chain variable domains which are able to combine with four light chain variable domain polypeptides to form four antigen binding sites directed against the same antigen.

69. (Once Amended) The polypeptide chain of claim 66 wherein the antigen is a DR5 receptor in the Tumor Necrosis Factor (TNF) receptor superfamily.

Please cancel claims 70-73 without prejudice to later prosecution.

74. (Once Amended) The polypeptide chain of claim ~~67~~68 comprising the formula:

(a) VH-CH1-flexible linker-VH-CH1-flexible linker-VH-CH1;

(b) VH-CH1-flexible linker-VH-CH1-flexible linker-VH-CH1-flexible linker-VH-CH1; or

(c) (VH-CH1)_n, wherein n is three or four.

75. (Original) An isolated antibody comprising the polypeptide chain of claim 66.

76. (Original) The isolated antibody of claim 75 further comprising the three or more light chain or heavy chain variable domain polypeptides.

77. (Original) The isolated antibody of claim 76 comprising three or more light chain variable domain polypeptides, each comprising VL-CL.

Response to Office Action mailed on March 27, 2003

78. (Original) The isolated antibody of claim 77 comprising four light chain variable domain polypeptides, each comprising VL-CL.

10
Please cancel claim 79 without prejudice to later prosecution.

80. (Original) An immunoconjugate comprising the antibody of claim 75 conjugated with a cytotoxic agent.

81-93 Canceled
